

A Furukawa Company

OFS Participation at FTTH Conference 2008

► **Municipal Panel: Lessons Learned and Recipes for Successes**

OFS Speaker: John George, Director, Systems and Applications Engineering

Monday, September 22 - 1:00PM - 2:45PM, Room Presidential B

Leading municipal FTTH service providers will relay their valuable experiences in deploying FTTH, from concept to revenue. Getting financing, overcoming regulatory hurdles, acquiring content, building the network, and marketing to win will all be discussed. Hear the voices of experience to help you create a better FTTH experience for your residents, businesses, and cities.

► **Fundamental FTTH Planning and Design**

Track(s): Network Design - Construction & Management

Speaker: David Stallworth, OSP Design and Product Manager

Monday, September 22 - 2:00PM - 2:45PM, Room Ryman Ballroom A

Fundamental planning is defined as determining where to geographically place fiber feeder routes in a city or development, feeder boundaries, centralized splitter cabinets, and how to size splitter cabinets. This presentation provides the attendees with information that will equip them to make economical decisions based on an ideal configuration for feeder routes for a small or large city or area.

► **Understanding and Optimizing MDU Optical Cabling Systems**

Track(s): Technology - Understanding and Optimizing MDU Optical Cabling Systems

Speaker: John George, Director, Systems and Applications Engineering

Tuesday, September 23 - 3:45PM - 4:30PM, Room: Ryman Ballroom D

The latest options for fiber cabling systems that deliver FTTH services to apartment and condominium units will be described and analyzed for cost, reliability, and performance. New technologies such as plug and play indoor cabling systems, bend insensitive fiber cables, and spooled distribution systems will be considered along with traditional splicing based approaches. A cost model and general guidelines will be presented to help guide optimized fiber to the MDU deployments.

► **How Long is Long-Haul in a FTTH World? Poster**

(ID #48)

Guyton Swindell, Field Applications Manager, and Dave Mazzaresse, Technical Manager, Fiber Systems Engineering

Monday, September 22 and Tuesday, September 23, 2008 (Times of poster sessions to be announced)
